

Bee House Data Sheet

Name: _____

Municipality: _____

| | Date | Total # of Tubes | # of Tubes Used | Additional Notes |
|--------|------|------------------|-----------------|------------------|
| Spring | | | | |
| Summer | | | | |
| Fall | | | | |

Instructions:

1. Once a season, spend some time with your bee house, do a quick analysis of what you see, and record the total number of tubes in the bee house.
2. Count the number of tubes that are currently in use. Keep in mind that the tubes may not be full, so peek inside. Be careful not to disturb the bees.
3. For additional notes include things like: the colour of the walls (different species of bee used different materials to create their walls), any activity you notice while observing the house, any damage to bee house, etc.
