

Education Council Platform Statement

I am a proud Douglas College alumni and have been a dedicated member of the college community since 2014. In 2019, I became the Health Sciences Research coordinator which allowed me the opportunity to connect with faculty in all the Health Sciences programs. I serve on various committees, such as the Research and Scholarly Activity committees, Health Science Council, Grade Appeals, and the High-impact Practices in Education. Collaborating with colleagues within Health Sciences and across the college inspired me to learn more about college governance and find ways to better serve the Faculty of Health Sciences. My last four years serving as the Education Council representative has taught me about how all faculties contribute to the governance process. As a member of the Programs committee, I have become familiar with educational policies that guide our unique programs. If elected, I will ensure Health Sciences is represented in the college community. I bring to this role experience, an ongoing willingness to learn, as well as drive and enthusiasm to ensure Health Sciences has a voice at Education Council.
